

FUNMILOLA EREYOMI

TECHNICAL RECRUITER | TALENT ACQUISITION SPECIALIST | TECH HIRING

Lisboa, Portugal | +351 964 733 044 | funmilolaereyomi@gmail.com | [LinkedIn Profile](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Technical Recruiter and Talent Acquisition Specialist with 3+ years of dedicated technical hiring experience, built on nearly three years as a frontend developer working in JavaScript, React, and TypeScript. That engineering background enables independent, code-level assessment of engineering candidates without hiring-manager involvement at every stage. Owns full-cycle technical recruitment strategy across software engineering, DevOps, QA, mobile, data, cloud, and leadership hires (CTO, Engineering Manager, Scrum Master, Senior Project Manager) within fast-paced fintech environments, partnering directly with founders and engineering leadership on hiring strategy, headcount planning, and interview process design. Expert in multi-channel and executive sourcing, Boolean and X-Ray search, LinkedIn Recruiter, direct headhunting, competency-based interviewing, and ATS operations (Greenhouse, Lever, BambooHR). Closed 15+ technical roles and founded an independent recruiting practice. Fluent in English (C1). Based in Lisbon, available for hybrid or remote work.

CORE COMPETENCIES & RECRUITING TECHNOLOGIES

TECHNICAL PROFILES RECRUITED

Frontend Developers (React, Angular, Vue, Next.js) • Backend Developers (Node.js, Python, Java, .NET, PHP) • Full Stack Engineers • Mobile Developers (iOS, Android, React Native) • DevOps & Cloud Engineers (AWS, Azure, GCP) • QA Engineers & Automation Testers • Data Engineers & Data Scientists • ML Engineers & AI Specialists • Scrum Masters & Agile Coaches • Product Managers • Business Analysts • UX/UI Designers • Security Engineers • Solution Architects

PROFESSIONAL EXPERIENCE

TROCAH TECHNOLOGY LIMITED • London, United Kingdom (Remote)

Sep 2023 – Present

Technical Talent Acquisition Specialist

- Own end-to-end technical hiring strategy across software engineering, DevOps, QA, and leadership profiles, from intern through senior level, in a fast-paced fintech environment, closing 15+ roles by directing the full hiring lifecycle from intake briefing and sourcing strategy through offer negotiation and onboarding.
- Partner directly with engineering leads and hiring managers to define role requirements, headcount priorities, and competency-based interview frameworks, improving shortlist quality and reducing mis-hires across technical teams.
- Run advanced multi-channel and executive sourcing, Boolean search, X-Ray techniques, LinkedIn Recruiter, and targeted cold outreach — to engage senior and leadership-level candidates including CTOs, Scrum Masters, Senior Project Managers, and Engineering Managers who weren't actively job-hunting.
- Apply hands-on frontend engineering experience (React, TypeScript) to independently evaluate technical fit and code quality, removing engineering teams from early-stage screening and materially reducing time-to-hire while maintaining a strong offer-acceptance rate.
- Own recruitment operations end-to-end, ATS hygiene (Greenhouse, Lever), pipeline reporting, and interview coordination, giving hiring managers and stakeholders full visibility into hiring progress at every stage.
- Tracked outcomes for hires post-placement, with the majority remaining in role well past the 6-month mark and several promoted or given expanded scope within their first year, including a Senior Backend Engineer hire promoted to Tech Lead and a QA hire who went on to own the automation framework.
- Built and shipped a personal Kanban-based candidate tracking tool (React, TypeScript, Tailwind CSS) to manage pipeline visibility and follow-up workflows across multiple concurrent searches.

TALENQORA • Nigeria (Remote, Part-time)

Nov 2025 – Present

Founder

- Founded and run an early-stage recruiting startup connecting African talent with global remote job opportunities, sourcing candidates and posting relevant openings.
- Create and publish career content, CV tips, job openings, and recruiting insights across LinkedIn, Twitter/X, Instagram, and TikTok to grow audience engagement and support candidate sourcing.

FORGUTTI, Unipessoal LDA • Lisboa, Portugal (Part-time)

Jan 2025 – Present

Technical Recruiter – AI & Frontend Engineering

forgutti.com • vistopilot.com

- Recruit for an AI systems company building production AI: RAG pipelines, Claude API integrations and Claude-powered assistants, on a TypeScript-first stack of React, Next.js, Angular, NestJS, Node.js, PostgreSQL and Supabase with pgvector.
- Sourced, interviewed and placed the React and TypeScript developers who built VistoPilot (vistopilot.com), an AI relocation platform giving source-cited visa and immigration guidance across 197 origin countries, now live in production. The team was hired on fundamentals rather than years-of-experience filters, and it shipped.
- Source through Boolean searches built around stack keywords, adjacent job titles and previous employers, reaching passive candidates who never respond to job advertisements.
- Write personalised outreach referencing each candidate's actual stack and projects, which consistently outperforms templated InMails on reply rate.
- Interview end to end, from first screening call through structured technical-fit interviews assessing component architecture, type safety, state management and testing habits alongside communication, motivation and team fit.
- Calibrate briefs with engineering managers on what separates junior, mid and senior React work, keeping salary expectations realistic and presenting shortlists that reach final stage rather than being rejected on CV review.

BINCOM DEV CENTER • Lagos, Nigeria (Remote, Part-time)

May 2024 – Aug 2024

Mobile Application Development — Upskilling Course

- Completed a four-month part-time mobile application development course, building cross-platform applications with Cordova and Android Studio and practising Agile workflows through project-based coursework.
- Built first-hand understanding of mobile software team structures and the skills that distinguish high-performing candidates, directly informing technical screening for mobile roles.

TROCAH TECHNOLOGY LIMITED • London, United Kingdom (Remote)

June 2022 – June 2023

React Developer

- Built and optimized responsive interfaces for financial dashboards and data-driven applications using React.js and Tailwind CSS.
- Developed reusable React components with clean, modular architecture and integrated REST APIs for dynamic data synchronization across the platform.
- Improved application performance through lazy loading, code-splitting, and caching.

THINK ELOQUENTLY • Lagos, Nigeria (Hybrid)

Feb 2021 – Feb 2022

Front End Developer

- Designed and delivered production web interfaces using HTML, CSS, Bootstrap, and JavaScript across multiple Agile projects.
- Achieved a 70% improvement in software stability through systematic debugging and performance optimisation, and implemented accessible UI improvements that boosted end-user engagement by 15%.
- Participated in peer technical reviews and supported onboarding of junior developers, developing strong communication and evaluation skills that directly shaped the transition into IT recruitment.
- Developed responsive web and hybrid mobile experiences with HTML5, CSS, Bootstrap, JavaScript, and Cordova, improving cross-device compatibility by 30% and reducing page load times by 20%.

INTERN CHOICE • India (Remote)

Aug 2020 – Dec 2020

Frontend Developer Intern

- Refactored and migrated a legacy codebase to a maintainable architecture, improving application performance by 40%.
- Built an interactive JavaScript quiz application handling dynamic question rendering, scoring logic, and user interaction, plus a responsive landing page focused on clean UI and cross-browser compatibility.
- Worked within a structured remote engineering team, laying the foundation for a frontend engineering career before the transition into technical recruitment.

EDUCATION

Universidade Católica Portuguesa • Lisbon, Portugal

Sep 2024 – Present

Master of Arts — Leadership, Governance and Democracy Studies

Federal University of Oye-Ekiti • Nigeria

Aug 2017 – Dec 2021

Bachelor of Arts — International Relations • CGPA: 3.50 / 5.00 (Second Class Upper)

TECHNICAL PROFILE — IT RECRUITING ASSET

Nearly three years of professional frontend engineering experience provide a working foundation for evaluating technical talent, assessing technology stacks, and judging role fit without escalating every screen to the engineering team.

Languages & Frameworks: JavaScript, TypeScript, React, Next.js, Redux, Node.js, HTML/CSS, Tailwind, Bootstrap

ATS & Recruitment Platforms: Lever, Greenhouse, BambooHR, Wellfound Track (configured from scratch), HackerRank for technical assessment

Sourcing & Contact Enrichment: LinkedIn Recruiter & InMail, Boolean and Google X-Ray search, Apollo and Clay for verified contact data, job boards (Indeed, LinkedIn)

AI & Automation in Recruiting: Claude and Claude Cowork for pipeline management, inbox handling and candidate research; Read AI for screening call summaries so decisions happen the same day; automated outreach sequencing; a self-built React and TypeScript candidate tracker

Reporting & Collaboration: Google Sheets for pipeline reporting, time-to-fill tracking and talent market mapping; Google Meet, Slack, Jira, Figma, Git/GitHub, MySQL, Firebase

Methodologies: Agile / Scrum, Sprint Planning, Code Review, Technical Documentation, Remote Collaboration

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- PHR Exam Preparation — HRCI Human Resources Certification — Udemy, Jul 2026 — [View Certificate](#)
- IT Recruiters Bootcamp: Mastering the Art of Tech Hiring — Udemy (Valeria Frisch), Jun 2026 — 8 hrs — [View Certificate](#)
- Recruiter Training: Talent Acquisition Beginner to Advanced — Udemy (Craig Brown), Jun 2026 — 10 hrs — [View Certificate](#)
- Learning and Development — HRCI authorized course via Coursera, Jun 2026 — [View Certificate](#)
- The Complete Full-Stack Web Development Bootcamp — Udemy (Dr. Angela Yu), Nov 2025 — 61.5 hrs — [View Certificate](#)
- Frontend Developer Internship Certificate — Intern Choice, Dec 2021 — [View Certificate](#)
- NYSC Certificate — National Youth Service Corps, Apr 2024 — [View Certificate](#)
- Estoril Political Forum, 33rd Edition: "The Future of Artificial Intelligence" — Jun 2025 — [View Certificate](#)
- "The New Conflictuality, the (New) European Geopolitics" — Military University Institute, Portugal, Dec 2025 — [View Certificate](#)
